L.C. card 6—35347

This number identifies the Library of Congress printed card for the complete series of the *Catalog of Copyright Entries.*
For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Price of this part is given on page vi.

Preface

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided into parts corresponding to the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to identify the classes, and the prices of the semiannual issues.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

Information as to changes of copyright ownership is not included in the *Catalog*, but a search of the Copyright Office Assignments and Related Documents Indexes may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of $5 per hour.

In the case of each registration listed, except for renewals, there has been deposited a copy or copies of the work in accordance with the provisions contained in section 12, 13, 14, or 215 of Title 17 of the *United States Code*.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402. Orders may be placed for individual issues, as subscriptions for one or more parts, or for the complete *Catalog* at $20 a year, and for periods of one, two, or three years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the Superintendent of Documents.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington, D.C., 20540.

Organization of Parts

Each part listed in the following table records all current registrations in the class or classes indicated by the alphabetical symbols. Renewal registrations are listed separately at the end of each related part. The first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for the purpose of statistical analysis. A zero immediately following the symbol, e.g., AF0, EF0, identifies a foreign work deposited under the waiver-of-fee provision (section 215 of Title 17 of the *United States Code*). Some parts also contain registrations made under other symbols if the subject matter or type of material is similar to that generally included in the part.

Current Registrations 1

Renewal Registrations 959

Title Index 1043

Introduction

PART 1 lists works registered in class A and contributions to periodicals registered in class B under the symbol BB. Works for which the subsisting copyright has been renewed are listed separately in the Renewal Registrations section.

The works listed include not only the current output of the publishing industry of the United States and many works in English and in foreign languages published abroad, but also the products of many specialized publishing enterprises. Thus, in addition to novels, biographies, poems, books on history, religion, etc., and other works of general interest, there are included business reports and yearbooks, trade catalogs and directories, manuals, instruction books, industrial and legal services, research studies in many fields, and, in some instances, printed matter attached to or accompanying games, filmstrips, and other articles.

Each work is described in a main entry which includes information pertinent to the copyright claim. Arrangement of entries is alphabetical under the name of the author (i.e., the person or organization principally responsible for the content of the work) or, in the case of some serials and certain other works, under the title. References lead to the main entries from the names of contributing authors (e.g., joint authors, editors) and claimants.

Each name listed appears in the fullest form and in the spelling found in the work and accompanying application. A name recorded in connection with more than one work and application may therefore appear in varying forms and degrees of fullness.

The Title Index covers both works currently registered and renewals. Omitted are titles of telephone directories which can be found only in the main section under the name of the author, who is usually the claimant. Omitted also are titles of serials and other works which are entered under title in the first two sections. Renewal registrations are identified by the symbol (R).

For works currently registered, each main entry includes, in addition to the name or title under which it is filed, the following items of information if available and applicable:

1) Title.
2) Names of joint authors, editors, translators, etc., generally if no more than two.
3) Edition statement.
4) Place of publication for all foreign works; and for domestic works if given in an imprint on the work, unless the work is entered under the publisher as author.
5) Name of the first-named publisher given in an imprint on the work; when the

publisher is also the author the name is omitted.

6) Physical description, consisting of the number of pages or other terms descriptive of the work; unpaged works, and those with complicated or irregular paging are described as 1 v.; for works issued in more than one volume, the number of volumes is given. No description is given for directories and serials.
7) Series statement.
8) Statement that the work was first issued in a newspaper or magazine or that it was published with or as a part of another work.
9) Names of authors given in the application which do not appear elsewhere in the entry.
10) Name of the employer in the case of a work made for hire, if so named in the application.
11) Information contained in the application which relates to the registration of an earlier version of the work.
12) Brief statement of the new matter on which copyright is claimed, preceded by the abbreviation NM, if this information is given in the application and is not indicated elsewhere in the entry.
13) Copyright symbol ©.
14) A statement of limitation of claim to a certain portion of the work if the application explicitly limits the claim.
15) Name of the copyright claimant.
16) Date of publication as given in the application.
17) Registration number.

Whenever it is necessary to indicate a variation between the information given in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application are given first, followed by the phrase "in notice" and the data given in the work; e.g., © Richard Roe & Co.; 10Jan64 (in notice: 1963); A670000.

Works deposited in connection with copyright registration may be selected for inclusion in the collections of the Library of Congress. Library of Congress printed cards are available for many of the published works so selected. Orders for such cards or inquiries concerning them should be addressed to the Card Division, Building No. 159, Navy Yard, Washington, D.C. 20541.

For renewal registrations, each main entry includes, in addition to the name or title under which it is filed, the following items of information if available and applicable:

1) Title.
2) Names of authors of renewable matter when there are more than one.
3) Edition statement.
4) Number of volumes if more than one.
5) Series statement.
6) Brief statement of the new matter on which the original copyright was claimed, preceded by the abbreviation NM, if available in the renewal application.
7) Copyright symbol ©.
8) A statement of limitation of claim to a certain portion of the original work if the application explicitly limits the claim.
9) Date of original copyright.
10) Original registration number.
11) Name of the renewal claimant followed by a statement in parentheses, usually abbreviated, giving the basis of the renewal claim as supplied by the applicant; e.g., "John Doe (NK)" indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.
12) Date of receipt of the renewal application or fee, whichever is later.
13) Renewal registration number.
